

FIR28
**FIREFIGHTER
 STRUCTURAL TUNIC**

Fit for purpose second hand fire clothing

The garment combination (FIR28 tunic / FIR29 trouser) has a moisture management system that wicks moisture quickly away from the wearer adding to the overall comfort of the garment by keeping the wearer dryer for longer. The lightweight system has excellent radiant heat protection.

(Images are for illustrative purposes only - kit will differ in appearance due to previous uses, wear and laundering)

PRODUCT DETAILS

- Unique articulated sleeve construction gives full overhead and forward reach and minimises tunic lift. The ergonomic side panels create a bellows effect to expel hot air from within the garment via the collar.
- Pre-formed ergonomic sleeve to reflect arm curve at elbow for maximum comfort, ease of movement and reduced bulk.
- Elbows and shoulders have DuPont™ KEVLAR® pads for greater comfort and protection.
- Shortened storm flap allows for free movement of legs whilst climbing and crouching etc.
- Shaped rear to give greater coverage to back when crawling and crouching etc.
- Radio and torch loops left and right hand side, adjustable to fit all sizes.
- Thumb loops and adjustable wrist closure tabs to give a better seal with glove.
- Vertical concealed pockets under storm flap and patch pocket on lining.

STANDARDS

BS EN469:2005/AC:2006
 BS EN340:2003

OUTER SHELL FABRIC

Gold PBI rip stop 205gms fabric with Petroguard finish. PBI fabric remains supple when impinged by flame and will not carbonize and break open. The rip stop weave is designed to reduce tearing of the fabric by slowing the rip on the grid pattern. The fabric benefits from a strong durable water repellent finish (Petroguard) which allows run off from water, petrol and other liquid chemicals.

MOISTURE BARRIER

GORE-TEX Fireblocker® PTFE membrane. 135gms. GORE-TEX Fireblocker® is made from PTFE laminated to an aramid carrier fabric. The membrane is breathable and gives protection from the ingress of liquids such as water, petrol and other chemicals.

THERMAL BARRIER

DuPont™ NOMEX® Comfort lining quilted to 100% virgin aramid felt. 215gms. The light weight lining system has been developed to give excellent thermal resistance combined with moisture management that rapidly removes moisture from the lining face keeping the wearer dryer for longer.

FIR29
**FIREFIGHTER
 STRUCTURAL TROUSER**

Fit for purpose second hand fire clothing

The garment combination (FIR28 tunic / FIR29 trouser) has a moisture management system that wicks moisture quickly away from the wearer adding to the overall comfort of the garment by keeping the wearer dryer for longer. The lightweight system has excellent radiant heat protection.
