GORE-TEX PRODUCTS.
WE’LL NEVER LET YOU DOWN

BALLYCLARE

We’ve been keeping workers safe and comfortable for well over a 100 years – building a reputation as one of the UK’s leading workwear and protective clothing suppliers.

OUR RANGE

Ballyclare’s innovative waterproof GORE-TEX garments, female, polycotton, multi-hazard and flame retardant range of high vis garments, are fully waterproof, breathable, flame retardant, anti-static with arc protection whilst welding.

Ballyclare’s hi vis range meets the highest specifications required for clothing, protecting you from the rigours of weather and keeping you seen and safe in hazardous working environments.

SAFETY STANDARDS

All our Personal Protection Equipment (PPE) is approved to the requisite national and international safety standards governing performance and quality of manufacture.

GORE-TEX GARMENTS

GORE-TEX fabrics take protective clothing to another level: they’re fully waterproof and windproof and highly breathable to avoid heat build-up. They can also stand high water pressure and severe mechanical stresses – everything it takes to perform beyond expectations and last several years in hard use.

GORE-TEX fabrics are proven in industrial laundering to the International Standard ISO 15797 (Textiles - Industrial washing and finishing procedures for testing of workwear). GORE-TEX fabrics take protective clothing to another level: they’re fully waterproof and windproof; and highly breathable to avoid heat build-up. They can also stand high water pressure and severe mechanical stresses – everything it takes to perform beyond expectations and last several years in hard use. Fully seam sealed with proprietary GORE-SEAM® Tape to provide ultimate full waterproofness to meet and exceed the EN 14360 Protective Clothing Against Rain test with no leakage after extended use simulation.

The unique GORE-TEX Membrane - Every square inch has 9 billion pores that are 20,000 times smaller than a water droplet, so water can’t penetrate but sweat vapour molecules can escape, keeping the wearer dry from the inside.

HV152

Hi Vis GORE-TEX Waterproof Jacket
This is our best performing unlined waterproof hi vis jacket that is approved and worn by Network Rail. The GORE-TEX Fabric provides full durable, waterproof and windproof protection while offering the highest levels of breathability providing the ultimate protection from both warm, wet climates and extreme wet weather conditions. The HV152 can be combined and worn with the Thermal Bodywarmer HV198.

Size: S-5XL

HV153

Hi Vis GORE-TEX Waterproof Bomber Jacket
This GORE-TEX Fabric waterproof bomber jacket is shorter than our other waterproof jackets and sits on the waist allowing easy access to trouser pockets and utility belts. This jacket offers full waterproof and windproof protection while offering the highest levels of breathability.

Size: S-5XL

HV150

Hi Vis GORE-TEX Waterproof Thermal Jacket
This is our best performing thermal waterproof GORE-TEX Fabric hi vis jacket that is approved and worn by Network Rail. The waterproof and thermal layers provide protection against extreme wet and cold conditions.

Size: S-5XL

HV159

Hi Vis GORE-TEX Waterproof Thermal Coverall
This is our best performing thermal waterproof GORE-TEX Fabric hi vis coverall. The one-piece design and quilted lining provides extra protection and comfort to the wearer.

Size: S-5XL

HV14

Hi Vis GORE-TEX Waterproof Salopette
These are our most popular salopette in waterproof GORE-TEX Fabric. They are a comfortable option that provide more protection in wet weather than a trouser. The over the shoulder braces, elasticated back waist and front zip offer comfort for the wearer.

Size: S-5XL

Fits: Short/Reg/Tall/Extra Tall

HV158

Hi Vis GORE-TEX Waterproof Thermal Salopette
In addition to the extra protection provided by a salopette design, the waterproof GORE-TEX Fabric is coupled with a thermal layer. This thermal layer provides protection against extreme conditions meaning this salopette can be worn comfortably in cold winter months.

Size: S-5XL

Fits: Short/Reg/Tall/Extra Tall

GORE-TEX Fabrics are proven in industrial laundering to the International Standard ISO 15797 (Textiles - Industrial washing and finishing procedures for testing of workwear).
It’s a simple fact of life that a garment primarily designed for a man won’t be fit for purpose when worn by a woman. Familiarity beats the problem with this new specially designed range, with female-friendly features.

As well as offering a more comfortable, tailored fit, our female-fit hi vis range meets the very highest specifications to protect against the worst weather and keeps the wearer warm and safe in the most hazardous working environments.

We’re the only UK manufacturer to offer a female fit waterproof GORE-TEX Fabric range.

Technology built in by GORE-TEX Fabrics takes the Ballyclare female range of protective clothing to another level: they’re fully waterproof and windproof, and highly breathable to avoid heat build-up. They can also stand high water pressures and severe mechanical stresses — everything it takes to perform beyond expectations and last several years in hard use.

Female sizes are from 8 – 20

Industrially launderable. Durable and long lasting

We worked with female wearers in a number of live trials and used their feedback to design garments that actually offer real benefits to the end user.

Trialled and tested with female workers within industry

Our waterproofs are fully seam sealed with proprietary GORE-SEAM® Tape to provide ultimate full waterproofness to meet and exceed the EN 14360 Protective Clothing Against Rain test with no leakage after extended use simulation

Ballyclare’s administration and sales office is in Stockport and is well positioned for easy access to the motorway network, Manchester airport and the national rail network.

The company operates to the highest standards and is accredited to the quality standard BS EN ISO 9001:2015 and the environmental management standard BS EN ISO 14001:2015.

Ballyclare is a verified member of RISQS (Railway Industry Supplier Qualification Scheme), BSIF (British Safety Industry Federation) and is a BSIF Registered Safety Supplier.

Under the European Union Directive 89/686/EEC on personal protective equipment (PPE), Article 11B is an externally-audited accreditation and ‘System for ensuring quality of production by means of monitoring’ and relates to the consistent and compliant manufacture of complex (“life saving”) PPE.

This means you can be confident Ballyclare Article 11B garments have been manufactured with an approved quality-control system that not only requires auditing of the system documentation, technical files and production site, but also of other premises involved in the process such as head offices and design offices.

More information about PPE Standards can be found at ballyclarelimited.com
